PUD

Planned Unit Development

The purpose and intent of the PUD District is to provide a flexible, alternative procedure to encourage imaginative and innovative designs for the unified development of property. The PUD rules are designed: (i) to allow development which is harmonious with nearby areas; (ii) to enhance and preserve areas which are unique or have outstanding scenic, environmental, cultural or historic significance; (iii) to provide an alternative for more efficient use of land, resulting in smaller utility networks, safer streets, more open space, and lower construction and maintenance costs; (iv) to encourage harmonious and coordinated development, considering natural features, community facilities, circulation patterns and surrounding properties and neighborhoods; (v) to facilitate the analysis of the effect of development upon the tax base, the local economy, population, public facilities and the environment; (vi) to provide and result in an enhanced residential and/or work environment for those persons living and/or working within the district; and (vii) to require the application of professional planning and design techniques to achieve overall coordinate mixed-use developments and avoid the negative effects of piecemeal, segregated or unplanned development.
